Personal Safety

Personal safety is a very wide subject. From PPE, operation of hand tools, blood borne pathogens to body parts safety and machine guarding, and everything in between.

OSCTS brings you 66 different on-line courses to your screen. Taking the course by supervisors and workers will greatly improve safety on the site, and the cost of course comparing to the cost of accident is minimal. Also, if accident happened, putting workers through training is an excellent remedial action. Personally, I'd rather take the course and be safer, than take the course after the fact as a remedial action.

You can find all 66 courses at <https://www.oscts.ca/product-category/personal-safety/>
