Driving Safety and Driver Improvement

Most people believe that they are the best drivers in the world. Just look through the window while on the road. We are not much different than other road users.

Personally I took some driving improvement on-line training while employed as a part of employment requirements. And it changed my point of view on the value of the on-line training in this area. I think, in the last few years I have avoided few road accidents due to the knowledge gained through taking courses. Minuscule cost comparing to the cost of accident and all the damage.

OSCTS brings you 29 courses in the subject of road safety and driver improvement. You can even find course for Alberta - how to remove 3 demerit points from your driver license. You can find them at

<https://www.oscts.ca/product-category/driver-improvement/>

And if you search above location, you can find some free courses.
