On-Line Mobile Equipment Training - Yes it can be done

Mobile equipment (e.g. forklift, telehandler, EWP e.t.c.) training consist two parts

First Part is In-class or on-line training. It needs to cover safety aspects of pre-job inspection, equipment operation, hazards associated with, operation of controls, limitation of equipment and safe operating procedures and practices. OSCTS brings you wide variety of mobile equipment training programs. They can be found at <https://www.oscts.ca/product-category/mobile-equipment-safety/>

Second Part - practical operators competency training is hands-on field equipment training. When sending worker to the training facility for regular e.g. EWP course, worker usually has only few minutes of hands-on equipment practical training, and needs to be trained on-site to the competency level

Equipment operators competency program. Every company utilizing mobile equipment needs to develop equipment operators competency program. It should include requirements for the training and evaluation of operators for competency of operation of the equipment.

Workers must be verified for the competency of operation of every model of the equipment they operate

Mobile equipment on-line training courses
