

Oil Sands & Construction Training & Safety Ltd

Accident Investigation

Proper accident investigation aim is not to put blame on the person or organization, but to find the root cause of the accident and to implement measures to prevent future occurrences.

As with every activities, person involved in accident investigation needs to be competent. Competency is defined as by having enough training, knowledge and experience to be able to do work or perform activity with minimum or no supervision

Experience you already have, or will gain through assisting with accident investigations. OSCTS can help you with the training and knowledge providing access to accident investigation on-line courses, which can be found at <https://www.oscts.ca/product-category/accident-investigation/>
