## Atmospheric Hazards

Regardless where you are, there is always potential for atmospheric hazards

Everybody is aware of deadly hazard of asbestos, people are still dying from being exposed many years ago, but not everybody is aware of e.g. harmful effect of silica which may be present in the cloud of dust left behind driving car or truck

Indoors or outdoors, at home or at work, air quality depends on many factors, and needs to be considered for our and others safety. Allergies, asthma, and other health effects can be generated by atmospheric contaminants, not mentioning working in hazardous environment like proximity to welding, painting, or other industrial activities creating high concentration of harmful substances

Awareness and recognition of atmospheric hazards is as important as protecting ourselves from any other hazards or danger, and requires proper hazard assessment

OSCTS brings you a very good range of on-line courses on the subject, they can be found at <https://www.oscts.ca/product-category/atmospheric-hazards/>

## More Information

If you are interested in more information, or would like to discuss how OSCTS can be of assistance to your organization regarding classroom or on-line training, call 780-983-0155, or send email to [cezary.giluk@oscts.ca](mailto:cezary.giluk@oscts.ca)

---

## Pipelines Training Support

### Two most popular courses:

**PCST** (Pipeline Construction Safety Training) - required from all workers and supporting

trades involved with pipelines construction

[https://www.oscts.ca/product/pcst\\_online-pipeline-construction-safety-training-pcst/](https://www.oscts.ca/product/pcst_online-pipeline-construction-safety-training-pcst/)

**Ground Disturbance Level 2** <https://www.oscts.ca/product-category/pipelines-training/>

Full range of courses for pipeline companies managers and supervisors <https://www.oscts.ca/product-category/management-construction-industry/>, and workers <https://www.oscts.ca/product-category/pipelines-training/>

**OSCTS advantage** - **we supply PCST PINs within 15 minutes from time of order.** When ordering from other suppliers usually you need to wait 2 working days

**OSCTS supplies PCST PINs during and after hours, and over the weekends**

---
